Comments:

Please look over the attached proposal which would place this application in condition for allowance. I am proposing removal of "only" from the claim as there is no support for this limitation. The "unthreaded" feature that I am suggesting defines over the art since the art shows a threaded connection between the first and second annular projections. Please get back to me as soon as possible as this application is under Final. Also, if this proposal is agreeable to you, I will make the changes by an Examiner's Amendment. An extension of time fee will also need to be charged.
